TouchIT
St. Petersburg

Frontend Developer

Stack: React, TypeScript, Vite, Telegram Mini App, REST API, WebSocket, RTK Query, Redux Toolkit, Axios, Tailwind CSS, ESLint, Prettier, Git, Jira

Responsibilities:

- Develop and modernize SPA applications on React with TypeScript based on Figma designs, using Vite for fast builds and project optimization.
- Develop Telegram Mini Apps with integration of Telegram WebApp API for mobile platforms.
- Integrate REST API: sending/receiving data, caching (RTK Query, Redux Toolkit, Axios), error handling, query optimization.
- Create adaptive and responsive UI using Tailwind CSS.
- Lead projects independently, ensuring self-organization and independent technical decision-making.
- Set up and maintain ESLint and Prettier to ensure consistent code style and compliance with quality standards in projects.
- Experience working in Jira for task setting, progress tracking, and sprint planning.
- Version control: Manage projects using Git.

Achievements:

- Gaming Application in Telegram
- Task: Create a game to retain audience and monetize.
- Solution: Developed a mini-app with game mechanics (falling objects), virtual store, system of daily and partner tasks. Integrated a referral program and prize draw system. Implemented onboarding and training.
- Result: A complete product with full user interaction cycle, which attracted major partners such as "Sokolov", "T2", "Detsky Mir", "Zarina" and various medical centers.
- Medical Application in Telegram
- Task: Automate doctor appointment process and improve convenience for patients.
- Solution: Implemented an app for online booking, visit management (creation, rescheduling, cancellation), treatment history tracking, and doctor profiles viewing.
- Result: Simplified booking process for patients and reduced load on the clinic's call center.
- Admin Panel for Medical Application
- Task: Provide administrators with a tool for managing bookings and prompt client communication.
- Solution: Developed an admin panel with booking management functionality and integration of chat with users in Telegram (WebSocket).
- Result: Increased request processing speed and communication quality between the clinic and patients.

FLX

Kazan, www.flaconrf.ru

Frontend Developer

Stack: React, TypeScript, Vite, REST API, Redux Toolkit, Axios, Material UI, Material React Table, CSS, SCSS, ESLint, Prettier, Git, Nginx, Bitrix24, Yandex Maps

Responsibilities:

- Develop and modernize SPA applications on React with TypeScript based on Figma designs, using Vite for fast builds and project optimization.
- Integrate REST API: sending/receiving data, caching (Redux Toolkit, Axios), error handling, query optimization.
- Create adaptive and responsive UI using Material UI, CSS and SCSS.
- Implement complex interactive tables with filtering, sorting, and pagination (Material React Table).
- Set up and maintain ESLint and Prettier to ensure consistent code style and compliance with quality standards in projects.

- Lead projects independently, ensuring self-organization and independent technical decision-making.
- Set up deployment of applications via Nginx and Docker Compose.
- Manage version control of code via Git, participate in code review.
- Fix bugs identified during testing.
- Periodically conduct team calls to discuss tasks and solutions within Scrum.
- Write technical documentation for projects, simplifying onboarding and code maintenance.
- Developed a career growth matrix for the IT department, contributing to team development.
- Monitor the IT department's payment system, ensuring transparency and accuracy of financial operations.

Top Achievements:

1. Widget Integration "MoySklad" → SDEK

- Task: Eliminate manual delivery processing.
- Solution: Autonomous widget on React, embedded in "MoySklad" interface via iframe. Integration with "MoySklad" and SDEK APIs, map for selecting pickup points (Yandex Maps), auto-filling data.
- Result: Order processing time reduced by 30%, number of errors — by 25%.

2. Application for Managing Promotions

- Task: Accelerate mass application of discounts to 1000+ products.
- Solution: SPA with flexible product selection (by categories, brands) and batch application of rules.
- Result: Promotion launch time decreased from 1 hour to 15 minutes.

3. Web Application for Working with Price Lists

- Task: Provide managers with a convenient tool for catalog work and generating commercial proposals.
- Solution: Implemented complex tables (filtering, sorting, pagination, auto-completion) and instant data export to PDF.
- Result: Client conversion increased by 15% due to speed of preparing commercial proposals.

PluhSoft

Armenia, www.dilijanlogistics.com

Frontend Developer

Stack: React, React Native, TypeScript, Vite, REST API, Redux Toolkit, Axios, Material UI, CSS, SCSS, ESLint, Prettier, Git, Azure, Yandex Maps

Responsibilities:

- Developed and modernized SPA applications on React and mobile applications on React Native using TypeScript based on Figma designs.
- Integrated REST API using Redux Toolkit and Axios, implementing caching, error handling and query optimization.
- Created adaptive and responsive UI using Material UI and CSS.

- Set up and maintained ESLint and Prettier to ensure consistent code style and compliance with quality standards in projects.
- Conducted code review for interns, ensuring compliance with code standards and improvement of project quality.
- Wrote technical documentation, simplifying onboarding and training in new technologies.
- Managed version control of code via Git, actively participated in code review.
- Participated in Scrum processes, including sprint planning and task discussions in team calls.
- Wrote unit tests using Jest to ensure code quality and test coverage.
- Fixed identified bugs.

Top Achievements:

1. Development of Logistics and Excursion Processes

- Task: Expand web application functionality and simplify service ordering.
- Solution: Implemented new modules for booking freight transportation and excursions.
- Result: Number of orders increased by 20% due to optimization of user path.

2. Implementation of Reviews Section

- Task: Increase trust in the service.
- Solution: Developed a system for collecting and displaying user ratings.
- Result: Collected 500+ reviews, increasing client trust by 15%.

3. Maps Module for Logistics on Yandex Maps API

- Task: Visually display delivery points and routes.
- Solution: Integrated maps displaying 100+ points and routes.
- Result: Simplified work for dispatchers and improved visualization for clients.

4. Cross-Platform MVP on React Native

- Task: Quickly launch a mobile application for iOS and Android.
- Solution: Independently mastered React Native in 1 month and created an MVP analog of "Avito".
- Result: Application supports 1000+ listings on two platforms.

5. Integration of Bank Card Payments

- Task: Automate payment process.
- Solution: Implemented payment gateway via API.
- Result: Load on dispatchers decreased by 40%, order processing speed increased by 15%.

6. Optimization of API Interactions

- Task: Increase speed and reliability of requests.
- Solution: Rewrote HTTP requests from fetch to Axios.
- Result: Performance of API interactions improved by 25% due to optimized caching.

Education

2013-2018	Kazan Law Institute Legal Support of National Security, Jurisprudence
2023-2025	School21 Programming

Skills

Figma, REST API, Vite, Jest, Axios, Git, JavaScript, TypeScript, HTML, CSS, React Native, React, Postman, Docker-compose, Nginx, Swagger, SPA, SOLID, SaaS, HTML5, CSS3, Redux, Tailwind, Material UI, RTK Query, WebSocket

About Me

Frontend developer with 3+ years of experience in creating SPA and cross-platform Telegram Mini Apps on React/TypeScript stack. Transitioned to IT from jurisprudence after intensive training at School21 (Sber). Seeking projects where I can grow as a developer and contribute to the team.
